Betent No. 6174993

GENERAL INFORMATION:
PAPPLICANT: Bene-Sasson, Shmuel A.
TITLE OF INVENTION: SHORT PEPTIDES WHICH SELECTIVELY
TITLE OF INVENTION: MODULATE THE ACTIVITY OF SERINE/THREONINE KINASES
INVERES OF SEQUENCES: 2.2
CORRESPONDENCE ADDRESS:
ADDRESSEE: Hamilton, Brook, Smith & Reynolds, P.C.
STREET: Two Militia Drive
CITY: Lexington
STATE: Massachusetts
COUNTRY: USA
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  ö

Sequence 12, Application US/09739455

Patent No. 6413756

GENERAL INFORMATION:
APPLICANT: YAN, Chunhua et al
TITLE OF INVENTION: ACID MOLECULES ENCODING HUMAN KINASE PROTEINS, NUCLEIC
TITLE OF INVENTION: THERED MOLECULES ENCODING HUMAN KINASE PROTEINS, AND USES
TITLE OF INVENTION: THERED FOR THE REPRENCE: CLOOG633
CURRENT APPLICATION NUMBER: US/09/739,455
CURRENT PILING DATE: 2000-12-19
NUMBER OF SEQ ID NOS: 23
SOFTWARE: FastSEQ for Windows Version 4.0

SEQ ID NO 12
LENGTH: 303
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Sequence 22, Application US/09739455

Patent No. 6174993
GENERAL INFORMATION:
APPLICANT: Ben-Sasson, Shmuel A.
TITLE OF INVENTION: SHORT PEPTIDES WHICH SELECTIVELY
TITLE OF INVENTION: MODULATE THE ACTIVITY OF SERINE/THREONINE KINASES
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Gaps
                   Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          .
